## Publishing Office

Pergamon Press plc, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England [Tel. Exeter (0392) 51558; Fax 425370].

## Subscription and Advertising Offices

North America: Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A.; Rest of the World: Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England [Tel. Oxford (0865) 794141].

Publication Frequency: 8 issues/annum. Copyright © 1991 Pergamon Press plc

### Subscription Rates

Annual institutional subscription rate (1992): £330.00 (US\$530.00). Two-year institutional rate (1992/93): £627.00 (US\$1007.00). Sterling prices are definitive. US\$ prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan are available on request.

### Back Issues

Back issues of all previously published volumes, in both hard copy and on microform are available direct from Pergamon Press offices.

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproduction of similar nature, and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

Photocopying Information for Users in the U.S.A. The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid. The appropriate remittance of \$3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970, U.S.A.

Permission for other use. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for copying. The Item-fee Code for this publication is 0305-0648/91 \$3.00 + 0.00

## List of Contents

### NUMBER 1

|   |  |
|---|--|
| <b>Rajendra Solanki</b>   | 1 Generating the noninferior set in mixed integer biobjective linear programs: an application to a location problem        |
| <b>Hermínio Simões Gomes and José Mario Martínez</b>                                | 17 A numerically stable reduced-gradient type algorithm for solving large-scale linearly constrained minimization problems |
| <b>David Whitaker and Susan M. Brown</b>  | 33 Linear programme modelling with databases   |
| <b>Douglas J. White</b>   | 43 The maximal dispersion problem and the "first point outside the neighbourhood" heuristic                                |
| <b>Ho Woo Lee and Soon Seok Lee</b>   | 51 A batch arrival queue with different vacations  |
| <b>Manlio Gaudioso and Pasquale Legato</b>  | 59 Linear programming models for load balancing  |
| <b>Saul I. Gass</b>   | 65 Military manpower planning models   |
| <b>Lawrence Bodin and Azita Kashani</b>   | 75 The zone hopping problem  |
| <b>Cliff T. Ragsdale and Patrick G. McKeown</b>                                     | 87 An algorithm for solving fixed-charge problems using surrogate constraints  |
| <b>Wan S. Shin and A. Ravindran</b>   | 97 Interactive multiple objective optimization: Survey I—continuous case   |
| <b>Tzvi Raz and Dennis Bricker</b>  | 115 Optimal and heuristic solutions to the variable inspection policy problem  |
| <b>Note</b><br><b>Bernard Dickman,<br/>Yonah Wilamowsky and<br/>Sheldon Epstein</b> | 125 Optimal common due-date with limited completion time   |
| <b>Conference Announcement</b>  | I  |

### NUMBER 2

|  |   |
|--|---|
| <b>Noel Bryson</b>                       | 129 Parametric programming and Lagrangian relaxation: the case of the network problem with a single side-constraint |
| <b>Daoud Ait Kadi and Robert Cléroux</b> | 141 Replacement strategies with mixed corrective actions at failure   |

|  |  |
|--|--|
| <b>R. Ramesh and<br/>Kathleen M. Brown</b>               | 151 An efficient four-phase heuristic for the generalized<br>orienteer problem   |
| <b>Choong Y. Lee</b>                                     | 167 An optimal algorithm for the multiproduct capaci-<br>tated facility location problem with a choice of<br>facility type |
| <b>Saligrama R. Agnihothri</b>                           | 183 Complementarity between the finite capacity and<br>finite source queuing systems                                       |
| <b>Wen Lea Pearn</b>                                     | 189 Augment-Insert algorithms for the capacitated arc<br>routing problem   |
| <b>Robert R. Trippi and<br/>Efraim Turban</b>            | 199 Parallel processing and OR/MS  |
| <b>Laura Ignizio Burke</b>                               | 211 Introduction to artificial neural systems for pattern<br>recognition   |
| <b>Jati K. Sengupta</b>                                  | 221 Robust decisions in economic models  |
| <b>Eero Kasanen, Ralf Östermark<br/>and Milan Zeleny</b> | 233 Gestalt system of holistic graphics: new manage-<br>ment support view of MCDM  |

### NUMBER 3

|  |   |
|--|---|
| <b>Bharat K. Kaku,<br/>Gerald L. Thompson and<br/>Thomas E. Morton</b> | 241 A hybrid heuristic for the facilities layout problem  |
| <b>J. K. Suryanarayanan,<br/>B. L. Golden and Q. Wang</b>              | 255 A new heuristic for the linear placement problem  |
| <b>M. Desrochers and<br/>T. W. Verhoog</b>                             | 263 A new heuristic for the fleet size and mix vehicle<br>routing problem                       |
| <b>Christopher L. Huntley<br/>and Donald E. Brown</b>                  | 275 A parallel heuristic for quadratic assignment<br>problems                                   |
| <b>Lee Josvanger Crowder<br/>and V. A. Sposito</b>                     | 291 Sequential linear goal programming: implemen-<br>tation via MPSX/370E                       |
| <b>Muhammad El-Taha and<br/>John R. Heath</b>                          | 297 A model of channel allocation in multichannel local<br>networks                             |
| <b>Cesar G. Tapia and<br/>Bruce A. Murtagh</b>                         | 307 Interactive fuzzy programming with preference<br>criteria in multiobjective decision-making |
| <b>Bahram Alidaee</b>  | 317 Single machine scheduling with nonlinear cost<br>functions                                  |

|  |   |
|--|---|
| <b>A. M. A. Hariri and<br/>C. N. Potts</b> | 323 Heuristics for scheduling unrelated parallel machines |
| <b>Corrigendum</b>                         | 333   |

#### NUMBER 4

|  |   |
|--|---|
| <b>Margaret F. Shipley,<br/>Andre de Korvin<br/>and Riad Obid</b>      | 335 A decision making model for multi-attribute problems incorporating uncertainty and bias measures  |
| <b>Don Hommertzheim,<br/>John Huffman and<br/>Ihsan Sabuncuoglu</b>    | 343 Training an artificial neural network the pure pursuit maneuver   |
| <b>Patrice Marcotte and<br/>Gilles Savard</b>                          | 355 A note on the Pareto optimality of solutions to the linear bilevel programming problem  |
| <b>Yves De Serres</b>  | 361 Simultaneous optimization of flow-control and scheduling in a single server queue with two job classes: numerical results and approximation |
| <b>Chung-Yee Lee,<br/>Surya Liman Danusaputro<br/>and Chen-Sin Lin</b> | 379 Minimizing weighted number of tardy jobs and weighted earliness-tardiness penalties about a common due date                                 |
| <b>Marvin D. Troutt and<br/>Suresh K. Tadisina</b>                     | 391 A mixed integer programming approach for accommodating outliers with the minimax absolute error criterion                                   |

#### NUMBER 5

|   |  |
|---|--|
| <b>Abraham Mehrez,<br/>Buddy L. Myers and<br/>Moutaz J. Khouja</b>        | 397 Quality and inventory issues within the newsboy problem  |
| <b>C. N. Potts</b>  | 411 Scheduling two job classes on a single machine   |
| <b>Avishai Ceder</b>  | 417 A procedure to adjust transit trip departure times through minimizing the maximum headway          |
| <b>Michael B. Silberholz,<br/>Bruce L. Golden and<br/>Edward K. Baker</b> | 433 Using simulation to study the impact of work rules on productivity at marine container terminals   |
| <b>In-Soo Lee</b>   | 453 A note on a deterministic production scheduling model  |
| <b>Prabuddha De,<br/>Jay B. Ghosh and<br/>Charles E. Wells</b>            | 457 On the minimization of the weighted number of tardy jobs with random processing times and deadline |

|  |   |
|--|---|
| <b>Prabuddha De,<br/>Jay B. Ghosh and<br/>Charles E. Wells</b> | 465 Scheduling to minimize weighted earliness and tardiness about a common due-date |
| <b>Kun-Jen Chung and<br/>Matthew J. Sobel</b>                  | 477 Linear programming solutions of the truncated moment problem                    |
| <b>Diptendu Sinha</b>  | 487 Optimal policy estimation for continuous review inventory systems               |

**Announcements**

I

**NUMBER 6**

|  |   |
|--|---|
| <b>Ayoade Kuye</b>   | 497 Numerical experiments with the one-dimensional non-linear simplex search                      |
| <b>Abid M. Elabdalla</b>   | 507 A note on multikey sorting using modified binary insertion trees                              |
| <b>Amiya K. Chakravarty and<br/>G. E. Martin</b>                     | 515 Operational economies of a process positioning determinant                                    |
| <b>Moshe B. Rosenwein</b>  | 531 An improved bounding procedure for the constrained assignment problem                         |
| <b>Kah Mun Cheh,<br/>Jeffrey B. Goldberg<br/>and Ronald G. Askin</b> | 537 A note on the effect of neighborhood structure in simulated annealing                         |
| <b>Parthasarati Dileepan and<br/>Tapan Sen</b>                       | 549 Job lateness in a two-machine flowshop with setup times separated                             |
| <b>Deb Ghosh and<br/>Ishwar Murthy</b>                               | 557 A solution procedure for the file allocation problem with file availability and response time |
| <b>Robert T. Barrett and<br/>R. Lawrence LaForge</b>                 | 569 A study of replanning frequencies in a material requirements planning system                  |
| <b>J. B. Rosen, S.-Z. Sun<br/>and G.-L. Xue</b>                      | 579 Algorithms for the quickest path problem and the enumeration of quickest paths                |

**OPERATIONS RESEARCH AND THE RUDE INTRUSIONS OF THE REAL WORLD**

**Samuel J. Raff**

v Preface

**James A. Chisman**

|  |
|--|
| 585 Preparing students and new practitioners for the real-world of OR/MS |
|--|

|                             |  |
|-----------------------------|--|
| <b>Wilfred Candler</b>      | 591 Coal blending—with acceptance sampling   |
| <b>Hamdy A. Taha</b>        | 597 Operations research analysis of a stock market problem                                     |
| <b>Douglas A. Samuelson</b> | 603 On the hazards of relying on mathematical models: three cases from Federal policy analysis |
| <b>Robert E. D. Woolsey</b> | 607 Being wrong with Clarke & Wright   |
| <b>Samuel J. Raff</b>       | 611 The Navy passive ranging problem   |
| <b>Salah E. Elmaghriby</b>  | 615 Manufacturing capacity and its measurement: a critical evaluation                          |
| <b>Saul I. Gass</b>         | 629 OR in the real world: how things go wrong  |
| <b>Fran Samuelson</b>       | 633 An intelligent spouse's view of OR   |
| <b>Announcements</b>        | I  |

#### NUMBER 8

|  |  |
|--|--|
| <b>Thomas A. Feo,<br/>Krishnamurthi Venkatraman<br/>and Jonathan F. Bard</b>   | 635 A GRASP® for a difficult single machine scheduling problem   |
| <b>J. J. Júdice and<br/>A. M. Faustino</b>                                     | 645 A computational analysis of LCP methods for bilinear and concave quadratic programming                                     |
| <b>Tom M. Cavalier and<br/>Brian J. Melloy</b>                                 | 655 An iterative linear programming solution to the Euclidean regression model   |
| <b>R. K-Y. Li and R. J. Willis</b>   | 663 Alternative resources in project scheduling  |
| <b>Marc J. Schniederjans,<br/>N. K. Kwak and<br/>James S. Frueh</b>            | 669 A stochastic linear programming model to improve automobile dealership operations  |
| <b>M. L. Chaudhry,<br/>U. C. Gupta and<br/>Manju Agarwal</b>                   | 679 On exact computational analysis of distributions of numbers in systems for $M/G/1/N+1$ and $GI/M/1/N+1$ queues using roots |
| <b>Yasushi Masuda and<br/>Ushio Sumita</b>                                     | 695 Numerical analysis of gracefully degrading fault-tolerant computer systems: semi-Markov and Laguerre transform approach    |
| <b>Leo W. G. Strijbosch,<br/>Arno G. M. Van Doorné<br/>and Willem J. Selen</b> | 709 A simplified MOLP algorithm: the MOLP-S procedure  |
| <b>Prabuddha De,<br/>Jay B. Ghosh and<br/>Charles E. Wells</b>                 | 717 Some clarifications on the bicriteria scheduling of unit execution time jobs on a single machine                           |

|   |  |
|---|--|
| <b>Alireza Ardalan</b>  | 721 Combined optimal price and optimal inventory re-plenishment policies when a sale results in increase in demand |
| <b>Michael M. Kostreva and<br/>Karen S. B. Jennings</b>                     | 731 Nurse scheduling on a microcomputer  |
| <b>K. Nurmi</b>   | 741 Travelling salesman problem tools for microcomputers   |
| <b>P. Constantopoulos,<br/>F. C. Schweppe and<br/>R. C. Larson</b>          | 751 ESTIA: a real-time consumer control scheme for space conditioning usage under spot electricity pricing         |
| <b>Jean-François Mondou,<br/>Teodor Gabriel Crainic<br/>and Sang Nguyen</b> | 767 Shortest path algorithms: a computational study with the C programming language                                |
| <b>B. V. Cadambi</b>  | 787 One machine scheduling to minimize expected mean tardiness—Part I  |
